

CS 250: The Linux Operating System
Assignment 7
Writing BASH Scripts

Introduction

During this hands-on project, you will login to a Linux workstation and develop a BASH script experimenting with a few Shell language constructs and commands.

Assignment

Write a shell script, named `ce`, to change the names of all files of the form `*.jpg` in a directory (supplied as argument 1) so that they have the same root as before but now end in `.JPG`.

Submission Instructions

Submit your `ce` script file on Blackboard.
